Our teachers

Koala House's teachers are qualified, hold certificates in education from the National University of Education (pre-school education teachers) and Hanoi National University of Education (English speaking teachers). Their knowledge and experience support Koala House's value and direction. Once appointed, they are trained in methodology and educational philosophy within Koala House. Training is undertaken throughout the school year and on-the-job by Koala House trainers (including Head Teachers, Board of Management, Director of Education, and visiting speakers). Teachers' progress and professional development is assessed regularly to help our teachers expand their range of skills and abilities.

- ***Our staff***

All Koala House staff members, in any position, share a passion for ensuring that children enjoy and thrive within an excellent caring and learning environment at Koala House.

- Our Facilities

- There are outdoor playgrounds for the children at each Koala House location. This is an important factor at Koala House as children's mental and physical health are enhanced by the ability to touch interact with nature, enjoy fresh air and natural sunlight and class schedules ensure time outdoors.

- Koala House Farm

- Koala House has grown organic vegetables in a 1000 square meters farm in Dong Mo, Ba

Vi since 2013 (about 45 minutes from Hanoi). The farm provides organic fresh vegetables for the children's daily meals. Organic growing techniques have been applied not only to bring real fresh vegetables to the children but also to care for the environment.

- Field trips to the farm are organized for Kindergarten students, providing wonderful opportunities for children to learn about nature and science, as well as observe and work with the farmers, to share and appreciate small achievements in life.
